

Dongle Information for Asset Graphics

(January 2014)

Dongle - why?

The dongle is for copy protection and includes a serial number. The licensing of the various application options is realized with a license code that is only valid for the particular dongle serial number.

Which hardware types exist?

Type	Name	Description
 PMS-DONGLE-USB	Sentinel USB	This type is supplied as default. Cannot be read without restriction by older software version.
 PMS-DONGLE-MICRO-USB	Sentinel Micro USB	It has the same functionality as Sentinel USB, but is much smaller. Extra charge. Particularly interesting for use on a laptop or specific PC hardware (e.g. touch panel PC).
 PMS-DONGLE-USB-OLD	Hardlock USB	The standard dongle of the recent years. Is now replaced by Sentinel USB.

Which dongle for which software release?

Version	Dongle	Description
Asset Graphics 5.4	Sentinel-USB Sentinel-Micro-USB Hardlock-USB	Sentinel dongle can only be used starting from software version 5.4.0.1045. Hardlock dongle work with all versions.
Asset Graphics 6.0	Sentinel-USB Sentinel-Micro-USB Hardlock-USB	Starting with version 6.0.1.0, the Sentinel dongle can be used. Hardlock dongle can also compatible. So an update of an existing version 5.4 to 6.0 without having to replace the physical dongle is possible. However, a new license key (for a fee) is required.
